Base Configuration

Base URL `{NEXT_PUBLIC_API_BASE_URL}` (env var)

Auth

A. Payment / Subscription Purchase Flow

Alur: (1) Get plan -> (2) Get payment methods -> (3) Purchase subscription with selected method -> (4) Show payment instruction (VA / Bank Transfer / QRIS) -> (5) Poll status setiap 5 detik (max 60x / 5 menit) sampai subscription_status = active.

1) Get Plans

URL `/api/v1/subscriptions/plans`

Metho

```
{
  "success": true,
  "data": [
    {
      "id": "string",
      "name": "string",
      "price": 99000,
      "duration_days": 30
    }
  ]
}
```

Catatan: FE mengambil plan pertama (data[0]) untuk halaman checkout.

2) Get Payment Methods

URL `/api/v1/payments/methods`

Metho

```
{
  "success": true,
  "data": {
    "all": [
      {
        "code": "virtual_account",   // atau "bank_transfer" / "qris"
        "name": "Virtual Account",
        "description": "Bayar via VA bank",
        "estimatedTime": "Real-time",
        "category": "Virtual Account"  // "Bank Transfer" / "QRIS"
      }
    ]
  }
}
```

Catatan: FE web menyembunyikan code "bank_transfer" (hanya VA & QRIS ditampilkan). Mobile bebas menampilkan sesuai kebutuhan.

3) Purchase Subscription (Create Transaction)

URL `/api/v1/payments/subscriptions/purchase`

Metho

```
{
  "plan_id": "string",
  "payment_type": "virtual_account" | "bank_transfer" | "qris",
  "va_bank": "MANDIRI" | "BCA" | "CIMB" | "DANAMON"   // wajib jika virtual_account
}
```

Response

```
{
  "success": true,
  "data": {
    "payment_type": "virtual_account" | "bank_transfer" | "qris",
    "order_id": "string",
    "subscription_id": "string",
    "invoice_id": "string",

    // === Jika payment_type = "virtual_account" ===
    "virtual_account_no": "8808xxxxxxxx",
    "va_expiry": "2026-09-08T12:00:00Z",
    "amount": "99000",

    // === Jika payment_type = "bank_transfer" ===
    "bank_name": "BCA",
    "bank_account_no": "1234567890",
    "bank_account_name": "PT Sublime",
    "payment_code": "123",
    "amount": "99123",
    "expired_date": "2026-09-08T12:00:00Z",

    // === Jika payment_type = "qris" ===
    "qr_content": "00020101021226...",
    "validity_period": "2026-09-07T18:00:00Z",
    "reference_no": "string"
  }
}
```

4) Check Payment Status (Polling)

URL `/api/v1/payments/status/{order_id}`

Metho

```
{
  "success": true,
  "data": {
    "subscription_status": "active" | "pending" | "expired" | "cancelled"
    // field lain: invoice_status, order_id, dsb.
  }
}
```

Polling: setiap 5 detik, maksimum 60x (5 menit). Stop polling jika status = active (sukses) / expired / cancelled (gagal).

VA Bank Options (hardcoded di FE)

```
MANDIRI  -> Bank Mandiri
BCA      -> BCA
CIMB     -> CIMB Niaga
DANAMON  -> Bank Danamon
```

B. Affiliate Withdrawal Flow

Alur: (1) Get balance -> (2) Get saved banks -> (opsional) Add bank baru -> (3) Request withdrawal -> (4) Refresh balance & history. Menggunakan BATpay, transfer real-time (beberapa menit).

1) Get Withdrawal Balance

URL `/api/v1/affiliates/withdrawals/balance`

Metho

```
{
  "success": true,
  "data": {
    "available_balance": 150000,   // saldo yang bisa ditarik (dipakai FE)
    "total_earnings": 500000,
    "pending_balance": 20000,
    "withdrawn": 330000
  }
}
```

Catatan: mobile HARUS menampilkan available_balance (bukan total_earnings). FE web sudah dikoreksi ke available_balance.

2) Get Saved Bank Accounts

URL `/api/v1/affiliates/banks`

Metho

```
{
  "success": true,
  "data": [
    {
      "id": "string",
      "bank_name": "BCA",
      "bank_code": "bca",
      "account_number": "1234567890",
      "account_holder_name": "John Doe"
    }
  ]
}
```

3) Get Supported Bank List (untuk form tambah rekening)

URL `/api/v1/affiliates/banks/list`

Metho

```
{
  "success": true,
  "data": [
    { "name": "BCA",     "code": "bca" },
    { "name": "Mandiri", "code": "mandiri" },
    { "name": "BNI",     "code": "bni" },
    { "name": "BRI",     "code": "bri" }
    // ... daftar bank lain
```

```
  ]
}
```

4) Add Bank Account

URL `/api/v1/affiliates/banks`

Metho

```
{
  "bank_name": "BCA",
  "bank_code": "bca",
  "account_number": "1234567890",
  "account_holder_name": "John Doe"
}
```

Response

```
{
  "success": true,
  "data": { "id": "string", ...fields di atas }
}
```

Catatan penting: field harus persis bank_name, bank_code, account_number, account_holder_name. FE web sempat salah field (account_name / account_holder), sekarang sudah diperbaiki.

5) Delete Bank Account

URL `/api/v1/affiliates/banks/{id}`

Metho

6) Request Withdrawal

URL `/api/v1/affiliates/withdrawals`

Metho

```
{
  "amount": 50000,              // integer Rupiah, min 10000
  "bank_account_id": "string"  // id dari saved bank
}
```

Response

```
{
  "success": true,
  "data": {
    "id": "string",
    "amount": 50000,
    "status": "pending" | "processing" | "success" | "failed",
    "bank_account_id": "string",
    "created_at": "ISO datetime"
  }
}
```

Validasi FE: amount >= 10.000 dan amount <= available_balance.

7) Get Withdrawal History

URL `/api/v1/affiliates/withdrawals`

Metho

```
{
  "success": true,
  "data": [
    {
      "id": "string",
      "amount": 50000,
      "status": "success",
      "bank_name": "BCA",
      "account_number": "1234567890",
      "created_at": "ISO datetime",
      "processed_at": "ISO datetime"
    }
  ]
}
```

C. Endpoint Cheat Sheet

Module	Method	URL
Payment	GET	/api/v1/subscriptions/plans
Payment	GET	/api/v1/payments/methods
Payment	POST	/api/v1/payments/subscriptions/purchase
Payment	GET	/api/v1/payments/status/{order_id}
Withdrawal	GET	/api/v1/affiliates/withdrawals/balance
Withdrawal	GET	/api/v1/affiliates/banks
Withdrawal	GET	/api/v1/affiliates/banks/list
Withdrawal	POST	/api/v1/affiliates/banks
Withdrawal	DELETE	/api/v1/affiliates/banks/{id}
Withdrawal	POST	/api/v1/affiliates/withdrawals
Withdrawal	GET	/api/v1/affiliates/withdrawals

Dokumen di-generate dari source code sublime-fe/sublime-landing. Field response 'data' yang tidak dipakai FE tidak tercantum, silakan verifikasi kelengkapannya via Swagger/Postman backend jika perlu.
